

Cowles Auditorium

The newly remodeled Cowles Auditorium, carpeted with tiered theater-style seating, provides an intimate feeling while accommodating a large group. The wall at the back of the stage doubles as a projection screen. A podium, microphone, and LCD projector are standard equipment. The stage area is 28' x 8'. Cowles Auditorium accommodates up to 250 people.

Presenters must provide a laptop for a digital presentation. All cable connections are at the podium. All Apple Macintosh laptop computers require a VGA adapter to connect to the standard laptop cable. The VGA input is the universal standard for external display devices. The type of VGA adapter varies by Mac laptop model and age.

An AV Technician is on hand to assist you with set up, lights, etc. Please check in at the Humphrey Center Info Booth when you arrive.
